PROFILE

IB Diploma Programme student with strong interests in computer science, cybersecurity, artificial intelligence, web/app development, and human-centered digital design. Founder of WebLift, a social-impact initiative supporting NGOs through website development and digital accessibility. Experienced in building research-informed technology projects that combine creativity, accessibility, social impact, communication, leadership, and independent learning.

EDUCATION

Victorious Kidss Educares, Pune, India | *IB Diploma Programme Student, expected graduation 2028*

- Completed five-year IB Middle Years Programme.
- Academic interests include computer science, technology, cybersecurity, artificial intelligence, research, design, and technology for social impact.

MAJOR PROJECTS

MindWall | *Student Mental Well-Being Web App* | *MYP Portfolio Project*

- Designed and developed a student-focused mental well-being web app for teenagers aged 13-16, supporting emotional reflection, anonymous expression, and peer encouragement.
- Built features including daily mood check-ins, a personal journal, anonymous supportive message wall, emoji reactions, breathing exercises, affirmations, and a calm student-friendly interface.
- Demonstrated web app development, UX/UI design, accessibility thinking, user-centered research, testing, reflection, and social impact design.

WebLift Initiative | *Founder* | *NGO Digital Presence Project*

- Founded an initiative to help NGOs improve online visibility and digital accessibility through functional website design and training.
- Designed and built websites, supported NGO teams in maintaining content independently, and applied web development skills to community service.
- Demonstrated leadership, client communication, mentoring, project management, digital accessibility, and service learning.

The Feline Effect | *Research-Based E-Magazine* | *IB MYP Personal Project*

- Created a research-based e-magazine exploring how cats transform human lives emotionally, socially, and psychologically.
- Combined academic research, survey insights, expert perspectives, personal storytelling, infographics, editorial layout, and visual design.
- Currently extending the project into a formal research paper on the human-cat bond, emotional well-being, companionship, loneliness, identity, care, and human-animal relationships.

PASSION PROJECTS

AirAware | *Live Pollution Checker*

- Built as a live pollution and air-quality awareness tool that helps users understand environmental conditions through a clear, accessible digital interface.
- Highlights interests in public-interest technology, data presentation, web development, and environmental awareness.

GestureSnap | *Gesture-Based Interaction Project*

- Developed as an interactive gesture-control experience focused on hands-free digital interaction and playful computer-vision-inspired usability.
- Highlights experimentation with interface design, accessibility-minded interaction, and user-friendly technical prototyping.

TruthLens AI | *AI Information-Credibility Tool*

- Created as an AI-themed tool for helping users think critically about online information, claims, and trust signals.
- Highlights interests in AI ethics, misinformation awareness, responsible technology, and clear explanatory design.

EchoPrint AI | *Digital Personality Mirror*

- Designed as an AI-powered reflection experience that turns user input into personality-style insights through an engaging digital interface.
- Highlights prompt design, human-centered AI, interactive storytelling, and creative product thinking.

PersonaChat AI | *Conversational AI Project*

- Built as a persona-based chat experience exploring how conversational interfaces can feel more personalized, expressive, and useful.
- Highlights chatbot design, user experience writing, AI interaction patterns, and rapid web prototyping.

Project links available upon request.

CYBERSECURITY AND AI EXPERIENCE

BuildUp Mirai Immersion | *Cybersecurity & AI | Certificate of Achievement, January 30, 2026*

- Completed an industry-style cybersecurity and AI project based on a simulated biomedical data breach at Genixa, an AI-based genetic disease risk prediction company.
- Investigated suspicious access activity, reviewed system permissions, analyzed logs, and recommended security controls.
- Applied log and timeline analysis, anomaly detection, access control, least privilege, incident reporting, data privacy, cybersecurity ethics, and Python-based rule logic.
- Received a special honorary mention for teamwork, leadership, and determination, plus a full scholarship for the BuildUp Summer Internship Program.

AWARDS AND RECOGNITION

Immerse Education Essay Competition: Academic Distinction Award; recognized among the top 9% of submissions reviewed by academic specialists.

Lumiere Scholars Essay Writing Competition: Excellence Award and \$750 scholarship to join Lumiere's Individual Research Program.

Immerse Education Summer Programme: 30% partial scholarship recipient.

BuildUp Summer Internship Program: Full scholarship recipient with special honorary mention for teamwork, leadership, and determination.

COURSES AND CERTIFICATIONS

Completed and ongoing coursework includes Security & Ethical Hacking: Attacking Web and AI Systems from the University of Colorado Boulder (issued May 2026), IBM Introduction to Software Engineering, BuildUp Mirai Immersion in Cybersecurity & AI, Canva Graphic Design Essentials, University of Maryland Cybersecurity for Everyone, Meta Programming in Python, Meta Back-End Development, and digital marketing/SEO/SEM coursework.

Certificates available upon request.

LEADERSHIP AND SERVICE

- Founded WebLift to help NGOs improve their digital presence through website development, training, and accessibility support.
- Mentored peers in coding, web development, and digital innovation through collaboration and knowledge-sharing.
- Helped NGO teams learn how to maintain and update websites independently, improving project sustainability.

SKILLS

Technical	Web development; app development concepts; Python programming; back-end development foundations; full-stack development learning; cybersecurity fundamentals; log analysis; anomaly detection; access control concepts; SEO and SEM basics; digital product design.
-----------	---

Design & Research	UX/UI design; graphic design; editorial design; information design; visual hierarchy; survey design; academic research; data interpretation; source evaluation; report writing; reflection and evaluation.
Transferable	Leadership; communication; collaboration; critical thinking; creative thinking; self-management; problem-solving; empathy; adaptability; independent learning.
Career Interests	Computer science; software development; cybersecurity; artificial intelligence; web and app development; human-computer interaction; digital design; technology for social impact.
